

Symmetry Panoramic Tax-Managed Global Equity Fund Summary Prospectus

November 15, 2018

Class I Shares

Symmetry Panoramic Tax-Managed Global Equity Fund (SPGTX)

The Fund's Statutory Prospectus and Statement of Additional Information dated August 9, 2018, as Revised on November 15, as may be amended or supplemented, are incorporated into and made part of this Summary Prospectus by reference.

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund online at www.panoramicfunds.com/prospectus. You can also get this information at no cost by calling 1-844-Sym-Fund (844-796-3863) or by sending an e-mail request to info@panoramicfunds.com.

These securities have not been approved or disapproved by the Securities and Exchange Commission ("SEC") nor has the SEC passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Symmetry Panoramic Tax-Managed Global Equity Fund

Investment Objective: The Fund seeks long-term capital appreciation.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	None
Maximum Deferred Sales Charge (Load) for Shares Held Less Than One Year (as a % of original purchase price)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees ⁽³⁾	0.65%
Distribution (12b-1) and Service Fees	None
Other Expenses ⁽¹⁾	0.41%
Acquired Fund Fees and Expenses ⁽²⁾	0.37%
Total Annual Fund Operating Expenses	1.43%
Fee Waivers and/or Expense Reimbursements ⁽³⁾	(0.64)%
Total Annual Fund Operating Expenses After Expense Waiver and/or Expense Reimbursement	0.79%

- (1) Based on estimated amounts for the current fiscal year.
- (2) “Acquired Fund Fees and Expenses” are based on estimated amounts for the current fiscal year.
- (3) Effective August 9, 2018, the Fund’s investment adviser, Symmetry Partners, LLC (“Symmetry” or the “Adviser”), has contractually agreed to waive its management fee until at least October 31, 2019 so that the aggregate management fee retained by the Adviser with respect to the Fund after payment of sub-advisory fees does not exceed 0.26% of the Fund’s average net assets. The Adviser also has contractually agreed to reduce the Fund’s fees and/or absorb expenses of the Fund until at least October 31, 2019 to ensure that total annual Fund operating expenses after expense waiver and reimbursement (exclusive of any front-end or contingent deferred loads; brokerage fees and commissions; acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short); taxes; and extraordinary expenses such as litigation expenses) will not exceed 0.42% of average daily net assets of the Fund. This agreement may be terminated by the Fund’s Board of Trustees on 60 days’ written notice to the Adviser. This fee waiver/expense reimbursement is subject to possible recoupment from the Fund in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved without exceeding the foregoing expense limits.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses are as shown in the table above and remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

	1 Year	3 Years
Class I	\$81	\$389

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are

held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance.

Principal Investment Strategies

The Fund is a diversified multi-strategy fund that seeks to achieve its investment objective primarily by implementing factor styles that the Fund's investment adviser, Symmetry Partners, LLC ("Symmetry" or the "Adviser"), believes have the potential to produce positive returns before fees over time. Under normal circumstances, the Fund will invest, directly or indirectly, at least 80% of its net assets in U.S. and foreign equity securities. The Fund primarily will invest in shares of registered, open-end investment companies and exchange-traded funds ("ETFs") (collectively, "Underlying Funds") that are principally invested in the equity securities of U.S. companies, foreign companies in developed markets and/or companies located in emerging markets. In addition to Underlying Funds that are principally invested in companies located in the United States, the Fund also will generally be invested in Underlying Funds who are principally invested in at least three foreign countries. Under normal market conditions, the Fund will invest significantly (at least 40% of its net assets unless market conditions are not deemed favorable, in which case the Fund will invest at least 30% of its net assets), either directly or indirectly, in companies organized, located or doing a substantial amount of business in three or more countries outside the United States. The Fund does not target a specific market capitalization and may invest in Underlying Funds focusing on different segments of the equity markets, including large ("large-cap"), mid ("mid-cap"), small ("small-cap") and micro-capitalization ("micro-cap") equity securities that the "Adviser believes offer the prospect of long-term capital appreciation. The Fund may also invest in Underlying Funds that primarily invest in U.S. and foreign real estate investment trusts ("REITs") and REIT-like investments. The Fund will invest, to the extent possible while maintain the overall investment strategy, in Underlying Funds that utilize tax management strategies to reduce the impact of federal income tax on shareholders' investment returns. The Fund will also invest in Underlying Funds that do not utilize such strategies. Although the Adviser and direct investments focus on the broad market in terms of market capitalization, the Fund's investments in Underlying Funds may be overweight to mid-cap, small-cap and micro-cap securities relative to their market weight. These companies generally are considered by the Adviser to be those whose market capitalizations are within the lower 25% of market capitalization of the MSCI ACWI IMI Index. The Underlying Funds also may invest in the financial sector. Certain Underlying Funds also may engage in strategies that require heightened turnover, and the Adviser may not consider portfolio turnover a limiting factor in making decisions for the Fund.

The Fund currently intends to invest its assets primarily in Underlying Funds or directly in the common stocks, preferred stocks or securities convertible into stocks, of U.S. and foreign companies in both developed countries and emerging market countries, as well as equity index futures, forward foreign currency contracts, foreign currencies, ETFs and depository receipts, pursuant to investment sub-advisory agreements with investment managers selected by the Adviser ("Sub-Advisers").

The Adviser seeks to manage a multi-factor Fund that provides exposure to different managers that in the Adviser's view are best able to deliver certain factor exposures as identified by the Adviser. The Adviser will generally access these investment managers either through open-end mutual funds, exchange-traded funds, or through a direct sub-advisory relationship with an investment manager. The Adviser will make a determination for each investment manager as to which type of access it believes is most advantageous to the Fund, and will make changes at its discretion. The Adviser looks for Underlying Funds or sub-advisory mandates that will feature characteristics associated with investment style factors that have been identified in certain academic research papers and that, although there is no guarantee of future results, the Adviser has identified as having historically shown the potential to deliver greater returns over time. Such factors may include market, value, momentum, quality, and size of the equity securities. Liquidity, volatility, and other factors that, in the opinion of the Adviser, are appropriate for achieving the Fund's investment objective may also be considered. The Fund will diversify its investments by investing in Underlying Funds that focus on different factors in the foreign equity markets, including emerging markets, as well as domestic equity markets.

There is no limit in the number of Underlying Funds in which the Fund may invest, and the Fund may invest more than 25% of its assets in one Underlying Fund.

The Adviser sets an overall asset allocation based on long-term strategic considerations and monitors the portfolio on an ongoing basis. The Adviser will periodically re-balance the portfolio and may change managers and/or exposures over time based on its evolving investment views amid changing market and economic conditions.

Periodically, the Adviser will review certain factors in each Underlying Fund and may add or remove Underlying Funds without notice to shareholders. The Adviser may also temporarily over or under-weight certain exposures for the purpose of managing distributions, which may include selling Fund investments to offset gains. To the extent that this activity causes the Fund to deviate from its typical factor exposures, it may not meet its investment objective. The Adviser may also temporarily alter its investments if market, economic or other signals warrant doing so in the view of the Adviser.

The Trust and the Adviser will be applying for an exemptive order from the U.S. Securities and Exchange Commission ("SEC") that would permit Symmetry, subject to certain conditions, and without the approval of shareholders, to hire and fire Sub-Advisers.

The application for exemptive relief will be subject to approval by the SEC and there is no assurance that the application will be approved. Subject to the approval of the exemptive application, the Adviser could allocate assets of the Fund to an investment sub-adviser to manage directly in the future. With respect to any portion of assets managed directly by a sub-adviser, the Fund utilizes a “multi-manager” approach whereby the Fund’s assets will be allocated to one or more sub-advisers, in percentages determined at the discretion of the Fund’s Adviser. Each sub-adviser acts independently from the others and utilizes its own distinct investment style in investing in selecting securities. However, each sub-adviser must operate within the constraints of the Fund’s investment objective, strategies and restrictions.

The Fund and its Underlying Funds will be invested in a way that takes into account the taxes payable by shareholders in connection with distributions of investment income and net realized gains to the extent possible within the confines of its investment strategy. Such portions of the Fund and Underlying Funds seek to reduce income distributions and distributions of realized short-term gains that are taxed as ordinary income, as well as distributions of realized long-term gains (taxed as long-term capital gains) while maintaining the overall strategy. This tax management strategy is generally designed so investors receive lower distributions of realized capital gains than funds that do not take tax consequences into account. Investors should not expect that there will be no capital gain distributions by the Fund, however, as the Underlying Funds generally will balance investment considerations with tax consequences in making investment decisions.

The Underlying Funds in which the Fund invests and the Fund itself also may use a variety of derivative instruments including futures and option contracts, forward contracts for equity securities and indices, forward foreign currency contracts, and swaps, including total return swaps.

Certain of the Underlying Funds and the Fund itself may lend their portfolio securities to generate additional income.

Principal Investment Risks: As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund’s net asset value and performance.

Because the Fund invests primarily in the Underlying Funds, the risks described below are in reference to the Underlying Funds, and to the extent that the Fund invests directly in securities and other instruments, the risks described below are also directly applicable to the Fund.

- *Asset Allocation Risk.* The risk that the selection by a manager of the Underlying Funds and the allocation of the Fund’s assets will cause the Fund to underperform other funds with similar investment objectives. In this regard, the Fund also may temporarily deviate from its factor exposures for the purpose of managing distributions. In addition, the Adviser may invest Fund assets in Underlying Funds managed by a limited number of investment managers. In such circumstances, the Fund’s performance could be substantially dependent on the performance of such managers. Similarly, the Adviser’s allocation of the Fund’s assets to a limited number of Underlying Funds may adversely affect the performance of the Fund, and, in such circumstances, it will be more sensitive to the performance and risks associated with those Underlying Funds and any investments in which such Underlying Funds focus.
- *Currency Risk.* The risk that foreign currencies will decline in value relative to the U.S. dollar and adversely affect the value of the Fund’s investments in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies.
- *Cybersecurity Risk.* There is risk to the Fund of an unauthorized breach and access to fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the investment adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders.
- *Derivatives Risk.* The derivative instruments in which the Fund may invest, either directly or through an Underlying Fund, may be more volatile than other instruments. The risks associated with investments in derivatives also include liquidity, interest rate, market, credit and management risks, mispricing or improper valuation. Changes in the market value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Fund or an Underlying Fund could lose more than the principal amount invested. In addition, if a derivative is being used for hedging purposes there can be no assurance given that each derivative position will achieve a perfect correlation with the security or currency against which it is being hedged, or that a particular derivative position will be available when sought by the portfolio manager.

- *Emerging Markets Risk.* Emerging markets are riskier than more developed markets because they tend to develop unevenly and may never fully develop. Investments in emerging markets may be considered speculative. Emerging markets are more likely to experience hyperinflation and currency devaluations, which adversely affect returns to U.S. investors. In addition, many emerging financial markets have far lower trading volumes and less liquidity than developed markets.
- *Equity Risk.* Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Preferred stocks are subject to the risk that the dividend on the stock may be changed or omitted by the issuer, and that participation in the growth of an issuer may be limited.
- *Financial Sector Risk.* The financial sector can be significantly affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and the impact of more stringent capital requirements. The Fund may be adversely affected by events or developments negatively impacting the financial sector.
- *Foreign (Non-U.S.) Investment Risk.* Foreign (non-U.S.) securities present greater investment risks than investing in the securities of U.S. issuers and may experience more rapid and extreme changes in value than the securities of U.S. companies, due to less information about foreign (non-U.S.) companies in the form of reports and ratings than about U.S. issuers; different accounting, auditing and financial reporting requirements; smaller markets; nationalization; expropriation or confiscatory taxation; currency blockage; or political changes or diplomatic developments. Foreign (non-U.S.) securities may also be less liquid and more difficult to value than securities of U.S. issuers.
- *Forward and Futures Contract Risk.* The successful use of forward and futures contracts draws upon the Adviser's skill and experience with respect to such instruments and are subject to special risk considerations. The primary risks associated with the use of forward and futures contracts, which may adversely affect the Fund's NAV and total return, are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Adviser's inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.
- *Geographic and Sector Risk.* The risk that if the Fund (or an Underlying Fund) invests a significant portion of its total assets in certain issuers within the same geographic region or economic sector, an adverse economic, business or political development affecting that region or sector may affect the value of the Fund's investments more than if the Fund's investments were not so focused. While the Fund may not concentrate in any one industry, the Fund may invest without limitation in a particular country or market sector.
- *High Portfolio Turnover Risk.* The Underlying Funds may engage in active trading, including investments made on a shorter-term basis, which may lead to increased expenses that may result in lower investment returns.
- *Investment Companies and Exchange-Traded Funds Risk.* When the Fund invests in other investment companies, including ETFs, it will bear additional expenses based on its pro rata share of the other investment company's or ETF's operating expenses, including the management fees of the Underlying Fund in addition to those paid by the Fund. The risk of owning an Underlying Fund generally reflects the risks of owning the underlying investments the Underlying Fund holds. The Fund also will incur brokerage costs when it purchases and sells ETFs.
- *Investment Style Risk.* The risk that different investment styles (e.g., "growth", "value" or "quantitative") tend to shift in and out of favor, depending on market and economic conditions as well as investor sentiment. The Fund may outperform or underperform other funds that employ a different investment style.
- *Momentum Style Risk.* Investing in or having exposure to securities with positive momentum entails investing in securities that have had above-average recent returns. These securities may be more volatile than a broad cross-section of securities. In addition, there may be periods when the momentum style is out of favor, and during which the investment performance of a Fund using a momentum strategy may suffer.

- *Value Investing Risk* is the risk that the market will not recognize a security's inherent value for a long time, or that a stock judged to be undervalued by the Fund's adviser may actually be appropriately priced or overvalued. Value oriented funds will typically underperform when growth investing is in favor.
- *Quantitative Investing Risk*. The value of securities or other investments selected using quantitative analysis can perform differently from the market as a whole or from their expected performance. This may be as a result of the factors used in building the multifactor quantitative model, the weights placed on each factor, the accuracy of historical data supplied by third parties, and changing sources of market returns.
- *Liquidity Risk*. Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations.
- *Management Risk*. The risk that investment strategies employed by the Adviser or a sub-adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies or that imperfections, errors or limitations in the tools and data used by the Adviser or a sub-adviser may cause unintended results.
- *Market Capitalization Risk*. Investing primarily in issuers in one market capitalization category (large, medium, small or micro) carries the risk that due to current market conditions that category may be out of favor with investors. Larger, more established companies may be unable to respond quickly to new competitive challenges or attain the high growth rate of successful smaller companies. Stocks of medium, small and micro capitalization companies may be more volatile than those of larger companies due to, among other things, narrower product lines, more limited financial resources and fewer experienced managers. In addition, there is typically less publicly available information about small and micro capitalization companies, and their stocks may have a more limited trading market than stocks of larger companies. Generally, the smaller the company size, the greater the risk.
- *Market Events Risk*. Financial markets are subject to periods of volatility, depressed valuations, decreased liquidity and heightened uncertainty, such as what was experienced in and around 2008. These conditions are an inevitable part of investing in capital markets and may continue, recur, worsen or spread. The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, may take steps to support financial markets, including by keeping interest rates at historically low levels. This and other government intervention may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. The U.S. government and the Federal Reserve may also reduce market support activities. Such reduction, including interest rate increases, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests. Policy and legislative changes in the United States and in other countries may also contribute to decreased liquidity and increased volatility in the financial markets. The impact of these influences on the markets, and the practical implications for market participants, may not be fully known for some time.
- *Market Risk*. Overall market risk may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign (non-U.S.) economic growth and market conditions, real or perceived adverse economic or political conditions, inflation, changes in interest rate levels, lack of liquidity in the bond markets, volatility in the equities market or adverse investor sentiment affect the securities markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.
- *New Fund Risk*. The Fund is newly-formed. Investors bear the risk that the Fund may not grow to or maintain economically viable size, not be successful in implementing its investment strategy, and may not employ a successful investment strategy, any of which could result in the Fund being liquidated at any time without shareholder approval and/or at a time that may not be favorable for certain shareholders. Such a liquidation could have negative tax consequences for shareholders. In addition, the Adviser, which was founded in 1996, has not previously managed a mutual fund.
- *Securities Lending Risk*. The Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the Fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. If the borrower of the securities fails financially, there could be delays in recovering the loaned securities or exercising rights to the collateral.
- *Tax-Managed Investing Risk*. Market conditions may limit the Fund's or an Underlying Fund's ability to generate tax losses or to generate dividend income taxed at favorable tax rates. The Fund's or an Underlying Fund's tax-management strategy may cause the Fund to hold a security in order to achieve more favorable tax-treatment or to sell a security in

order to create tax losses. The Fund's or an Underlying Fund's ability to utilize various tax-management techniques may be curtailed or eliminated in the future by tax legislation or regulation. Although the Fund as a result of its investments in Underlying Funds that utilize tax management strategies can generally be expected, over long timeframes, to distribute a smaller percentage of returns each year than an equity mutual fund that is managed without regard to tax considerations, there can be no assurance about the size of taxable distributions to shareholders of the Fund, and the opposite may occur.

- **Underlying Fund Risk.** The risk that the Fund's investment performance and its ability to achieve its investment objective are directly related to the performance of the Underlying Funds in which it invests. There can be no assurance that the Underlying Funds will achieve their respective investment objectives. The Fund is subject to the risks of the Underlying Funds in direct proportion to the allocation of its assets among the Underlying Funds.
- **Valuation Risk.** The sale price that the Fund could receive for a portfolio security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.
- **Volatility Risk.** An Underlying Fund may have investments that appreciate or decrease significantly in value over short periods of time. This may cause an Underlying Fund's net asset value per share to experience significant increases or declines in value over short periods of time.

Performance: Because the Fund has less than a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of this Prospectus. Updated performance information will be available at no cost by visiting panoramicfunds.com or by calling 1-844-Sym-Fund (844-796-3863).

Investment Adviser: Symmetry Partners, LLC (the "Adviser") serves as investment adviser to the Fund.

Portfolio Managers: The Fund is managed by a team that includes Dana D'Auria, Portfolio Manager and Managing Director; Philip McDonald, Portfolio Manager and Director of Investments; Rebecca Cioban, Portfolio Manager and Senior Research Associate; John McDermott, Portfolio Manager and Chief Investment Strategist; Patrick Sweeny, Portfolio Manager and Principal; and David Connelly, Jr., Portfolio Manager and Principal. The current team has managed the Fund since its inception in 2018.

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading by written request, by telephone at 1-844-Sym-Fund (844-796-3863), or through your broker. Redemptions will be paid by automated clearing house funds ("ACH"), check or wire transfer. The Fund or its Adviser may waive any of the minimum initial and subsequent investment amounts. The Fund generally is available for investment only by institutional clients, clients of registered investment advisors, clients of financial institutions and a limited number of certain other investors as approved from time to time by the Adviser. All investments are subject to approval of the Adviser.

Class	Minimum Investment	
	Initial	Subsequent
I	\$1,000	\$100

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies, including the Adviser, may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

The Fund's Statutory Prospectus and Statement of Additional Information dated August 9, 2018, as Revised on November 15, as may be amended or supplemented, are incorporated into and made part of this Summary Prospectus by reference.

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks.
