INVESTMENT OBJECTIVE

The Fund seeks positive long-term absolute returns.

INVESTMENT STRATEGY

The Fund is a diversified multi-strategy fund that seeks to achieve its investment objective primarily by implementing alternative factor styles in a largely beta-neutral capacity that the Fund's investment adviser, Symmetry Partners, LLC, believes have the potential to produce attractive returns over time.

BENCHMARK

HFRI Fund of Funds Conservative Index

TYPES OF INVESTMENTS

Under normal circumstances, the Fund pursues its investment strategy by investing at least 80% of its net assets in alternative investment strategies that target illiquidity premia from various event-driven and convergence, or arbitrage, trades, as well as factor premia from long-short strategies across multiple asset classes. The Fund will invest in shares of registered, open-end investment companies and exchange-traded funds ("ETFs") that provide exposure to a wide array of such alternative investment strategies.

INVESTOR PROFILE

Typical investors in this fund seek attractive risk-adjusted returns across various market environments, lower volatility and downside potential compared to stocks, and diversification to a traditional portfolio of stocks and bonds.

SYMMETRY PANORAMIC ALTERNATIVES FUND

Symmetry Partners, LLC is an investment advisory firm registered with the Securities and Exchange Commission. The firm only transacts business in states where it is properly registered, or exempted or excluded from registration requirements. Past Performance does not guarantee future results. Different types of investments involve varying degrees of risk, and there can be no assurance that the future performance of any specific investment, investment strategy, or product, or any non-investment related content, made reference to directly or indirectly in this material will be profitable, or prove successful. As with any investment strategy, there is the possibility of profitability as well as loss.

Symmetry Partners, LLC is not affiliated with SIDCO, AQR Capital Management, or J.P. Morgan Asset Management.

Diversification seeks to reduce volatility by spreading your investment dollars into various asset classes to add balance to your portfolio. Using this methodology, however, does not guarantee a profit or protection from loss in a declining market. Rebalancing assets can have tax consequences. If you sell assets in a taxable account you may have to pay tax on any gain resulting from the sale. Please consult your tax advisor.

RISK DISCLOSURE

Higher potential return generally involves greater risk, short term volatility is not uncommon when investing in various types of funds including but not limited to: sector, emerging markets, small and mid-cap funds. International investing involves special risks such as currency fluctuation, lower liquidity, political and economic uncertainties, and differences in accounting standards. Risks of foreign investing are generally intensified for investments in emerging markets. Risks for emerging markets include risks relating to the relatively smaller size and lesser liquidity of these markets, high inflation rates and adverse political developments. Risks for investing in international equity include foreign currency risk, as well as, fluctuation due to economic or political actions of foreign governments and/or less regulated or liquid markets. Risks for smaller companies include business risks, significant stock price fluctuation and illiquidity. Investing in real estate entails certain risks, including changes in: the economy, supply and demand, laws, tenant turnover, interest rates (including periods of high interest rates), availability of mortgage funds, operation expenses and cost of insurance. Some real estate investments offer limited liquidity options. Investing in higher-yielding, lower-rated bonds has a greater risk of price fluctuation and loss of principal income than U.S. government securities, such as U.S. Treasury bond and bills. Treasuries and government securities are guaranteed by the government for repayment of principal and interest if held to maturity. Investors should carefully assess the risks associated with an investment in the fund.

Long/short investment strategies utilize short selling, which involves selling a security not owned in anticipation that the security's price will decline. This strategy could result in losses if the value of the securities held long decrease and the value of the securities sold short increase.

Investing in commodities is often through futures trading, where the risk of loss in these contracts can be substantial. You and your advisor should carefully consider whether such trading is suitable depending on your financial situation.

Investments in commodities may have greater volatility than investments in traditional securities, particularly if the instruments involve leverage. The value of commodity-linked derivative instruments may be affected by charges in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. Use of leveraged commodity-linked derivatives creates the possibility of greater loss.

Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in losses that significantly exceed the original investment. The use of derivatives may not be successful, resulting in the investment losses, and the cost of such strategies may reduce investment returns.

EXPENSE RATIO DISCLOSURE

The fund's adviser has contractually agreed to waive its management fee until at least October 31, 2019 so that the aggregate management fee retained by the Adviser with respect to the fund after payment of sub-advisory fees does not exceed 0.25% of the Fund's average net assets. The Adviser also has contractually agreed to reduce the Fund's fees and/or absorb expenses of the Fund until at least October 31, 2019 to ensure that total annual Fund operating expenses after expense waiver and reimbursement (exclusive of any front-end or contingent deferred loads; brokerage fees and commissions; acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short); taxes; and extraordinary expenses such as litigation expenses) will not exceed 0.48% of average daily net assets of the Fund. This agreement may be terminated by the Fund's Board of Trustees on 60 days' written notice to the Adviser. This fee waiver/expense reimbursement is subject to possible recoupment from the Fund in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved without exceeding the foregoing expense limits.

INDEX DISCLOSURE AND DEFINITION

Indices are unmanaged. Investors cannot directly invest in an index. Indexes have no fees. Historical performance results for indexes generally do not reflect the deduction of transaction and/or custodial charges or investment management fees, the incurrence of which have the effect of decreasing historical performance results.

HFRI Fund of Funds (FOF) Conservative Index: FOFs classified as 'Conservative' exhibit one or more of the following characteristics: seek consistent returns by primarily investing in funds that generally engage in more 'conservative' strategies such as Equity Market Neutral, Fixed Income Arbitrage, and Convertible Arbitrage; exhibits a lower historical annual standard deviation than the HFRI Fund of Funds Composite Index. A fund in the HFI FOF Conservative Index shows generally consistent performance regardless of market conditions.
